SUMMER MAKERCAMP 2026

(Young Innovators Build the Future)

3D Design | Robotics | IoT | Coding | AI | Roblox
Invent, Innovate, Inspire: Your Summer of Real-World Discovery

Dear Parents,

Give your child a summer that sparks their future!

We're excited to launch the **Summer MakerCamp for Grades IV–XI** at Royal Global School, in partnership with **Sparkbee Foundation**. This camp gives students immersive, hands-on experiences in **3D design, robotics, IoT, coding, AI, and game design (roblox)**—empowering them to solve real-world challenges, spark creativity, and build confidence as future innovators.

Camp Location	: Royal Global School, Guwahati
Dates	: 29th & 30th June 2026
Time	: 08:00 AM – 02:00 PM
Facilities	: AC Transport provided, and a healthy lunch included
Camp Fee	: Rs. 3,500/- (non-refundable)

Programs & Daily Schedule

Each day: 6 hours of deep, hands-on learning and discovery.

What's Included: Expert instruction, all materials for in-camp projects, participation certificate, and a takeaway kit.

Day 1:

3D Design

Sketch an idea, sculpt it on screen, and watch a 3D printer bring it to life — every camper takes home something they designed from scratch.

Robotics

Wire up motors and sensors to build a line-following robot that navigates entirely on its own — real engineering, no code required.

IoT

Make everyday objects smart. Build a magnet-activated Magic Lamp and a working IR burglar alarm you will actually take home.

Day 2:

Coding

Write your first real code to command lights, gadgets and devices with an IR remote — logic you can watch come alive instantly.

AI

Step into artificial intelligence and build a voice-activated control system that listens and responds to your commands.

Roblox

Design levels, characters and entire worlds in Roblox Studio — then jump in and play the game you just built.

Registration (online):

Complete the online expression of interest form via:

<https://www.royalglobalschool.in/>

Seats are limited—secure your spot in the RGS Summer MakerCamp today!
